

Seaweed Cellulite Treatment

As a society, we celebrate Mother's Day in the month of May. Through the years, the meaning of Mother's Day has deepened for me. At first, it was for my mother. Later, I too, became a mother. Now, my second grandson is two months old and my heart is filled with gratitude. This year, two of my friends, Laurel Fleming and Ginger Lane's, mothers died. I dedicate this article to them.

For the month of May, we are offering our Lavender Daze Cellulite Treatment. This three step treatment focuses on the hips, thighs, calves, ankles, and the back of the arms. First, our professional seaweed powder combines the detoxifying properties of sea algae and the rejuvenating benefits of brewers yeast and spirulina to provide metabolic stimulation of the skin. Next, our seaweed gel wrap has sea kelp for metabolic stimulation and nutrient rich Klamath Blue-Green Algae to hydrate and detoxify. To finish, our Full Body Signature Massage with Wright Touch Naturals Body Butter in Lavender Daze.

We use three types of lavender essential oil for this anti cellulite special; lavender spike, lavender, and lavandin. These oils are particularly well known for their ability to promote growth of new cells and exert a balancing action on sebum. Seaweed and algae are great for super hydrating the body. They are perfect to prepare your hips and legs for the shorts and swim suits of summer. They are also useful in dehydrating the body after chemo-therapy. Seaweed is rich in amino acids, vitamins and minerals. These nutrients are all absorbed through your skin thereby increasing metabolism, revitalizing dermal elasticity, and minimize the dimpling of your skin.

How many nights have you gone to bed totally frazzled? We promise, if you come into our office and receive our Lavender Daze Cellulite Treatment, you will leave our office totally dazzled. Our May special is specially designed to soothe your mind and relax your whole body while rejuvenating your skin for summer. Give us a call at 678-669-9102 and read more about us at www.wrighttouchweb.com.

Welcome to summer,

Rebekah Wright, LMT
